After I installed the patch and everything, I tried to play renegade and it says "Your computer needs to restart to continue this patch". Then I clicked ok and my computer restarted. When I went to play renegade, the same message came up again and I restarted again. Now everytime I try to play renegade I am asked to restart.

same here, you need to uninstall renegade and install it again then download the update from http://ftp.westwood.com and after that it works (for me it did)

Subject: ok
