As far as I remember it says that game2.exe exists.  
Go to your Ren directory and rename game2.exe to game.exe. Then try to install RG again and it should work.

I got a better idea, just download the safe installer & follow the install instructions, if game.exe is still game2.exe, then just leave it as is  
meh...ur choice though :rolleyes:

and that's because RG renames the original game.exe to game2.exe and when you uninstall RG it doesn't rename it back to game.exe but leaves it that way.

the only thing you have to do is rename it to game.exe then you can install RG again
