First, I am trying to change the background color, and text color / style and such for a poll with .css, the poll is done with .php and I added in the proper code which is (I thought)
?>

```
<html>
<head>
<link rel="stylesheet" href="css.css" type="text/css">
</head>
</html>
```

<?

I keep getting an error when ever I do that though.

Second, The bars for the results are not working properly, they should have a background image. Your help is greatly appreciated!

Thank You in advance
Ohh ya the poll I am asking about is here. <http://www.egmods.com/Main/Poll/poll.php>

I don't know php, but the ?> and <? don't seem like proper html tags.

Also, in the code, you don't seem to have added in a "color=" or whatever the code is to color a background on a page. If you PM crimson to this thread, I'm sure she'll know what to do.

Before ?> and after <? is php code, I think that is correct, but I may be wrong. THX though, I'll try PM'ing Crimson

If you ask me isnt <?php and ?> the standered tags.
I dont know much about PHP will I am going to use it in the future.

EDIT: If I am mistaken don't you use the "echo" command when using HTML code in PHP code?

If so it would be this:

```
<?php  
  
echo"<html>"  
  . "head>"  
  . "link rel=\"stylesheet\" href=\"css.css\" type=\"text/css\">"  
  . "/head>"  
  . "/html> "  
  . "";  
  
?>
```

Sorry if I am wrong.

Thanks Matt, I'm not getting an error anymore, but the style is not showing up.

?>

```
<html>
<head>
<link rel="stylesheet" href="css.css" type="text/css">
</head>
<body>

<? more php stuff ?>

</body>
</html>
```

Your HTML document isn't constructed properly.

Thank You Crimson!
I'm still having a couple problems, but nothing to bad, if they can't be fixed then it's not a big deal because it doesn't really matter.

<http://www.egmods.com/Main/Poll/poll.php>

1. A bar (<http://www.egmods.com/Main/Poll/bar.gif>) should be showing up inside of the white boxes.
 2. All of the text except the link to view the archive is black. I would like it to be white.
