Do you have game2.exe in your renegade dir, and can you execute it? RenGuard can't read that file.

i'm still getting this bug. when i just install every thing works fine.

iam using the no cd game2.exe

show how u guys over looked something that gives me that bug.

this 3rd time i have it

have to uninstall renguard put patch over it reinstall renguard put game2.exe in his place

and wait for the next day i get this bloody error

I know this sounds stupid but if you do it like the exact same way as in my 'tut' you dont have any problems with it.

One note: Replace the game2.exe with the one you can download from my site and things should be allright. Its the no-cd version of game2.exe also.
