Uninstalling RG if you need to:

[list]  
Delete "Game.exe"  
Delete "htmlayout.dll"  
Rename "Game2.exe" to "Game.exe"  
[/list:u]  
Thats it.

It's not that they're stupid, it's that they don't wanna take the time to learn how to do things on computers, they're more lazy than stupid

Let it sit for a few mins, if it stays that way then just press Ctrl+Alt+Del and go into processes, end game.exe and then re-run RenGuard, it should work the 2nd or 3rd time

IRON-FARTUninstalling RG if you need to:

[list]  
Delete "Game.exe"  
Delete "htmlayout.dll"  
Rename "Game2.exe" to "Game.exe"  
[/list:u]  
Thats it.

Thats all you have to do to un-install it?

zunnie  
Then reinstall Renegade again and update the game to version 1.037 then copy your maps and sounds back to your Renegade\Data folder.

as i found out the WTF way the day when renguard needs to update it will (if ur playin ren) close ren, and say in the box at the bottom of the RG window that corrupted file game.exe has been found.

simply restart RG, it will auto update and all will be fine, i panicked for a few moments when it happened to me but then all was well
