You may or may not have noticed, but there it is...

Please post any visual glitches you see in there. This should not include the arabic buttons until I say I've fixed them all and you find another...

Do not post suggestions in there because I'm not ready to add features, but instead to fix existing ones.

Thanks!

Just a suggestion...
Personal Rank choices. We can choose our own ranks. =D

Okay guys and gals, firstly, please posts your bug and glitch findings in the actual bug and glitch forum, instead of this thread

Second, once the bug, glitches, and inconsistencies are taken care of, that forum will be renamed to "Suggestions", at which time you can make the suggestions for Avatars and whatever else ya want.

I am now locking this thread so you have no choice but to post in the proper forum instead of here
