Notice it comes with a Readme.txt file?

So many problems in this world would be solved if people like you would read it.

I don't get it...where's the problem?

After you put the \*\*\*\*\*.pkg file in your C:\Westwood\Renegade\Data folder, start the game, start a server, and select your mod under the drop-down menu in the map selection screen.

Also, please invest in a good spell-checker. I think yours is broken.
