In the message box at the bottom of the program, what was the reason it gave for kicking you off? Did it say one of your files (such as game2.exe) is unauthorised? If it did, say what unauthorised file it is, and we can troubleshoot why it's coming up unauthorised and/or give you an authorised version.

It's strange that it'd decide something was unauthorised 7 minutes into a game instead of at the start (where it scans everything). Unless you are adding files during the game which it detects as unauthorised in it's next scan.

p.s. please re-size or remove your picture. It's pointless here and only serves to stretch the text and create a horizontal scrollbar at the bottom.

You n00b!

Something in your OWN FREAKING RENEGEDE directory is CAUSING YOU to be disconnected.

Delete ALL *.w3d *.dds and all cheats from your renegade\ and renegade\data dir!

edit: drkhaze >> Use ENTERS in your post?

With what version do you get kicked?
There is a bug in the RG 1.03RC2 beta, revert your RenGuard version to version 1.02

Just delete the Game.exe (RenGuard 1.03RC2) and replace that exe with the Game.exe from RenGuard 1.02

Sorry i called you a n00b, i thought you didnt think lol

Why did you ignore my post trying to help? And does the mac 1.02 work for you?? How do we know if your issue is resolved? Also, rengaurd kicking you wouldn't have to do with the actual level or position on the level its-self.

Quote:edit: drkhaze >> Use ENTERS in your post?

I'll start using "enters" in my post (even though I already do, and you use too many) when you stop signing your name in gold at the bottom of your posts.

WE KNOW WHO WROTE THE POST. YOUR NAME IS NEXT TO IT.

Ziasod, has it just happened the once? As if thats it, then I wouldn't worry about it, as it could just be a glitch between you and the RG network.
If it has happened more than once, carry on bitching
