Ok, not sure if this is in the right place but here goes.

For some unknown reason i cannot load renguard up. everytime i try to open it i get the message "Error Computing CRC of Renguard."

I have uninstalled and reinstalled it and i still get the same problem

Any ideas?

Kingo

Make sure that "game2.exe" is about 4-5 MB in size. If it's about 115KB, then it's also RenGuard and your installation is incorrect. Download a new game2.exe here:
