IT ISNT HERE!crap! hmm,well you should go to like Buest Buy,or a Book Store and look for a Computer Book in the "ELECTRONICS" section,if there is one.The Best book you could buy is probly iether Windows 95 for Dummies,Windows 98 For Dummies,Windows 2000 For Dummies,Windows ME for dummies,or,if this is out,Windows XP for dummies.But,thats if you have one of the Windows Series computers.Oh,uh,i have windows XP just to let you kno-uh,i need to install an update for my computer.Oh,uh,in other words,i cant help ya...sorry...maybe try reinstalling C&C: Renegade over and choose FULL install,if you havnt chose that.but,if that doesnt work,i cant help ya.

maybe you need a better attitude... but anyways... try lowering your graphic settings... disabling sound... make sure the only programs running in ctrl-alt-del is explorer, rundll, rundll32(maybe), and renegade... then if that works then steadily up your stuff... and makje it in windowed mode...
