When the game has finished, you get a list with scores.
Sometimes several people get stars. :\ Weird!?
Maybe you guys can fix it!

Usually the "star" represents you, but I have noticed other people having "stars" other than you sometimes.

yea i know what you mean, i even had it sometimes that everyone else had a star but me lol :S

But this isnt really a big issue, keep the 'bug reports' to more serious bugs lol

I dont think 'bugs' like this seriously affect the playability of the game or something

I think his question sounds more to me like "Why exactly does that happen?" instead of "Can you fix this please?"

I think that bug (the volcano bug) and other similar bugs are related to missing manual vis points (those little cameras u get in leveledit) on those maps.

So, putting in the manual vis points and re-doing the vis would fix it.

When I typed this I was in a bit of a hurry.

I know it wasn't such a big deal, but if it can be fixed easily, then please do. =) The more fixed Renegade is, the better.
