Ok first let me say the renguard is a awesome program and I am glad for its existence, now let me detail my problem Yesterday I downloaded renguard 1.02 and it worked fine, now when I start it, it freezes on me.
all I get is the blank window nothing on it.

is it a bug or some other problem?

Thanks for the help

Lord_Kane

I think the RG network's out for upgrades & such, just run game2.exe (Renegade) till it's fixed :rolleyes:

thanks dark I thought I had a virus or some spyware.
now I know better

Its Ok now crimson thanks for the help,

I am not a good beta tester.

Lord_KaneI am not a good beta tester.
Same here...though when faced with a choice of probs & no reports, or no probs & a minor report,
I take the 2nd choice
You don't have to be a good beta tester to test something, you just need to provide a fair amount
of feedback noting any probs you have, the fewer the probs, the less detail you need to put
:rolleyes:
