really? i always tought that was an known feature.

quite odd to know that after alot of time after the tool release that not everyone know that..

the only think i never saw that the rainbow thingy

what is it exactly?

Hehe, I guess that's just one of those things that I thought everyone knew. We ought to make a list of simple questions like that, and then draw on the knowledge of the masses.

BTW, love the filename

Guess it could come in handy...

This W3D viewer is full of undiscovered things.

htmlgodHehe, I guess that's just one of those things that I thought everyone knew. We ought to make a list of simple questions like that, and then draw on the knowledge of the masses.

i just tought that door model having and rainbow thingy wouldnt fit. so i tought that was a feature related to light source property and rotation. the middle is showing where the origin rotation is. anyway i just wanted to know the pupose of it

so no need to be sarcastic.. that was just a simple question
