I want Renguard off, I have deleted all the files, but when I join any server (even if it isn't protected) it says please install Renguard Properly.How do I completely remove it?

Teh uninstaller removes all traces of Renguard. Maybe using that would have fixed it. Just deleting the files doesn't work.

You have to use the installer to properly remove it. I would venture to guess that you deleted some files but that you still have renguard on your system. To remove it make sure game2.exe is 4MB or so, and delete game.exe, then rename game2.exe to game.exe.
