No, like more specifically where the mod is. I went to the site and looked around but couldn't find the "matrix mod".

Search the Official Forums. Some1 posted it. I dunno which 1 Mizz downloaded, but the 1 I downloaded worked. All it did was make you jump very high and slow down bullets. I ran faster than a sniper bullet . Mine also had more extras.

The only matrix mod I know of is the one created by npsmith (<http://www.thecodesmith.com>) which gave everything a matrix code look.

Um...Taximes also made one that altered the gravity and bullet speed on a few maps, and added some extra characters in. I'm not sure if that's the one mentioned though...
