Ok, well, everyso often GMax goes wack. It starts showing only selection brackets when i use the hand pan tool. It's annoying! I wanna just see a wireframe, but NOOoo. GMax decided that I can only see a general box around the objects when panning. How do I fix it? In the past the oly way I've been able to fix it is to reinstall the ren tools and gmax.

PS. It does it when using any of the view change tools like Arc, Zoom, and Pan.
