We just played a clan match and it says Renguard is on but one of our members dosn thave renguard and he is on the server now. He also loaded a big head and is still on server with Big head. WTF we just did clan match and I know someone may of been cheating. He said he dleeted RG yesterday and can play on servers. This happen when RG came out wit one of our members long ago he deleted renguard and still can play.

HELP

server [WOLSpy] [BA] ~ToAsTeD~/RG

Yeah.. 5 rg users, and total 7 players on your server. I think this is a glitch in the SSC which I have fixed yesterday .. this will be released ASAP.

I let the SSC reconnect.

server [WOLSpy] [BA] ~ToAsTeD~/RG

:rolleyes:

Why do someone of your members (BA) have big head cheat on thier computer and use it in a clan war?

Hmmm let me think...

That can't have been him just trying it out could it?

What kind of cheater would let others know that they cheated?

Use some common sense.

Dan, you believe he cheats but nobody's got any proof... :rolleyes:

- 1) First off my son shoots as good today with Renguard on as he did a few months ago when you thought he was cheating and he will have no problem proving it. Either my son can still cheat with RenGuard loaded or Renguard dosnt work cause he shoots just as good today. Explain that?
- 2) I never said I loaded the cheat, another player did after the match was over to try to prove to me Renguard wasnt working cause I didnt believe him. He was right and I was wrong
- 3) You think BA sucks so bad that we cant use cheats then I wonder why this clan has had some of the same members in it and has been around for over 7 years. Love us or hate us but the BA is never ignored.
- 4) who asked this guy anyways? and how did he turn a topic about Renguard and how it works to a convo about the BA clan. Like I said BA is never ignored.

Thanks for the fix Mac we will be waiting for the release.

Ok, well i admit that this wasnt any of my business to comment on. However i remember a big war in the gsa lobby and on the ba forums between Mr Speed and Hitman, discussing this, which is where i drew my information from, hence in my original post saying that Speed should be asked for clarification. Im not here to argue with Speed, in my previous "discussions" with speed i have learned that there is no point talking to him, especially when it involves his son. I never said that BA cheat, YOU said that one of YOUR members loaded BH on, testing or no testing, why the hell does he have it on his/her PC, the conversation was always about BA and cheats, all i did was

comment upon this with unsubstantiated information, which was my bad.

Renguard isnt fullproof, only this week Mac said that one of our members was cheating and trying to bypass RG, so i kicked him from the clan, only to find out that mac himself also got kicked by renguard for the same bug. Sure RG is helping the community, but while there are people who want to mess with it, RG will never be 100%, it will certainly (i hope) be close to it, but never 100%.

Mr.Speed im not coming here to start a flame war because this isnt the place for it . We all know BA played gse just prior to you posting on your server so its obviously us you are referring to. When we joined the server all 8 of us got the announcement " you just connected to a renguard protected server" before the clan match started. So can mac verify that we connected to a renguard protected server and renguard was checking our data folder for cheats as none of us left the server over all 4 rounds we played ,to stop casting some sort of doubt in your mind that gse cheated when you know and i know you lost through pure skills and strategies alone. Get over it Mr.Speed and stop trying to accuse honest people like us who Support Renguard in gse and we even have our own renguard server "gse doomsday"so the year long cheat allegations are really becoming repetative.

So peter you must of been at all your clan members homes to hear the Renguard potected server thingy. Or are all your guys in the same houses so you all can hear it? I never mentioned gse or any of your members and renguard was f*cked up if you read the post up above. I told my clan we lost due to good skills Peter and not one of us that I know said you cheated. Just with Renguard

fked up at the time you can see my concerns but never said you cheated NEVER ONCE!!!!. Peter your a mean person and have no respect for anyone and all you do is dis this clan and many others everyday of your life and everyone knows what your like. Just the way you posted the pics as soon as you could and talked trash in the lobby.

This is a game and Im here for fun Go eat a duck Peter South

Hey we all know renguard will never be perfect... I informed speed weeks ago that RG has bugs and ways around it. (from what i have heard anyways.. but who knows lotsa shittalkers try to be cool and make up shit) but this kinda proves that RG isnt 100% cheat proof. Do I think GSE cheated? who knows...do I think PN is an ass 90% of the time.. ya.. do I think that RG is 100 cheatproof.. no Do I think this topic became worthless after the original answer from MAC.. ya.

Just stfu and play the game.

Its not all that hard to tell when someones using big head...

- 1st way to tell is they NEVER (almost) never buy tanks
- 2nd way is if they are on ur team and ur in a tank and they jump in and have big head on teh turrent jumps strait up.. this happens in APC's , lights, meds, buggies and mammys
- 3rd they get head shots 90% of time with 500 sniper.. ya I know some are real good.. and lotsa noobs dont straff or jump.. but I know how to jump and straff... even I can get head shots allot if theres noobs running ina strait line.
- 4th they wont do the wall test.. or they leave and come back and say.. "ok wall test me" lol.. ya im sure..

Now if their using bones... well.. Id love to test that out so I knew how to tell.. I mean u can think they are... but its allot harder to pick up on. We were ina game last night where this noob kept killin 1 shot with rocket launchers... but srever had renguard on.. now go figure that? I think it hadda be bones... but Im stupid when it comes to cheating.. lol. Ya ive tested out BH.. who hasnt? But that was months ago and it totaly takes the fun out of the game.. its boring if u cant miss.. and it actually ruins ya game I would imagine.. getting all used to the big head then going to reg.. sad really.. ITs too bad that everyone just cant be honest and mature.

I know this is none of my buisness and this thread isnt really the place but heres my 2 cents worth

Speed admits one of his members is using bighead on on a renguard server first of all what sort of clan leader would be stupid enough to admit this surely that member should be kicked from the clan and named and shamed

in response to irons comment about lots of people have downloaded them to try them i can only say this that i am proud that thru all this cheating crap i have NEVER even been interested in trying them

now while i will admit that people were curious to see what these cheats did (after all curiosity killed the cat and nearly killed renegade) and knowing the uproar this caused when people admitted to trying them on servers what i find incomprehensible is the idiots who STILL have them on there hard drives if they dont intend to use them

these are the people who refuse to use renguard and try to bring it down well it aint going to happen

keep up the good work crimson and co lets have an end to these retarded little shits who insist on keeping cheats installed on their hard drives

People try to say that RenGuard isn't 100% effective... well, NOT running RenGuard is 0% effective, so if I have the choice, I'll take 99% over 0% any day. Besides the fact that we fix exploits when we hear about them.

[View Forum Message](#) <> [Reply to Message](#)

MrSpeedHe plays on Renguard servers does that help you with proof?
People blame people for cheating mostly (now with RG out) because they are simply getting "owned". I played a lot before RG and could average about 40-50 kills in almost every game and get about 3 accusations from people everytime I played (which took the fun out of Renegade). I stopped playing because I was playing FarCry, but then came back to see that RG servers are full and Renegade got its "fun" back (now less accusations from n00bs). I sucked when I first came back, but now I got most of my skill back. On RG servers, I can still do better than the average sniper and get headshots again.

I do not know who believes RG works or not, but people like me have nothing to hide. If we aren't cheating, most likely we're not. You can tell by their responses to know if someone's cheating, plain and simple.

I hope that made any since, I think I zoned out at "People blame people..." Lol.

PS: Did you read all of this? (kudos)

[EDITED]

CrimsonPeople try to say that RenGuard isn't 100% effective... well, NOT running RenGuard is 0% effective, so if I have the choice, I'll take 99% over 0% any day. Besides the fact that we fix exploits when we hear about them.

Another great point made by the great Crimmy!

it was a test because we didnt believe it was possible but one member said he was not logged on because he didnt hear the "youve been connected....." chime. nobody blamed anyone of cheating

just that it was possible to do it. That player installed it played an entire match that only had BA in it in the first place. He proved it then uninstalled it. believe what you want, and quit making up crap. So speed posted a message to let crimson know there was a problem... why do you think we would tell crimson if we enjoy cheating so much.. get a brain and think about it before you post.

I have renguard on my pc.. I use it... however if we all say OK it worx and is 100% effective then yall wont fix its bugs will ya?

I play allot on UN servers and they do not use renguard and ya still get 1 person in a 32 player game who gets 60 kills and next closest is 20ish.. do I think that person cheats... most likely.. can I prove it? nope. I just left a game where it was 16 on 16 and when that person was gdi he got 19 kills on a full 30 min game... next map he was nod and got 48 kills in 10 min... u do the math. No one was even close to his kills.. but cuz hes in a *respected* clan no one questions it. But I KNOW 4 a fact if that was BA2k4 he would be accused of cheating (not that i think he doesnt) I do know however 4 a fact that my son LilDude does not use any cheats on renegade.. if I found em he would lose his pc and never get it back.. he knows this.. but I have seen him get booted too from servers for "using big head" even though I know hes not.. bottom line is certain people should never have released the .wd3 files to begin with. If they hadnt maybe (maybe) we wouldnt be dealing with this right now.

I agree that you shouldn't say "omg it works 100% it's impossible to bypass"... but you shouldn't go around saying that it sucks because "maybe someone could pass it"... If you tell us about an exploit we fix it. Every single time.

Most of these fixes are unseen by you because most of the security of the app is on the master servers. The most recent exploit we heard about was quickly traced to a bug in the master server code. It was fixed, the network was upgraded, problem solved.

CrimsonI agree that you shouldn't say "omg it works 100% it's impossible to bypass"... but you shouldn't go around saying that it sucks because "maybe someone could pass it"... If you tell us about an exploit we fix it. Every single time.

Yeah, it's annoying when you join a server and you get paged "I recognise you are running renguard, this will prove to any mods that you are not cheating if the need arises". It shouldn't be a means of proving, it should only be a means of "most likely, he/she isn't cheating, but you can't be certain." The general idea behind renguard would be better understood if people thought of renguard as more of a "shield" which can be broken a small amount of the time.

Crimsonthen how does that cut down on the cheating accusations? For us legit players, that's annoying too.

It cuts down because you know there will be a lot less people able to bypass the system, so you can take a seat back if someone pages you about another player cheating. But, if several people complain about that person, check.

I don't like the fact that renguard "does" allow people (that know how to bypass it) a means to cheat carefree and fearless. If people have this mentality that "renguard means he can't be cheating" that will only allow the cheating even more. Punkbuster has never been perfect in its design, and no-one thinks that way. If they thought the same about renguard, we'd have even better guarded servers.
