Hey crimson (or any administrator), will different templates be available for this forum in the near future? I know it's the official forum now, but this would still be the default theme for registered/unregistered users, just with different options should people get bored of the green/black look.

I was thinking of a theme where the green would be replaced with dark blue or something similar.

I do need to install a newer version -- I just don't want to alienate some people who don't like change. Either that or spend a LOT of time reapplying all the modifications I did... ick.

Then how about changing that out of place ignore icon?

I like how the layout is, and I'd be very upset if it were changed. That ignore icon is pretty annoying, though. I've pressed it by accident before...

I think falconxl has a neat ignore icon that fits in perfectly with the others.
