Well guys just thought id let u have a look at this cause i need some help on Texturing the ****
thing i cant figure out how to add certain textures to the different planes etec. Also does the Editor
on export make the relevant .dds filesweb site http://nhwk.freewebspace.com/[April 25, 2002:

not bad... perhaps either shorten the wings or make them fatter at the base, they look too long
and thin.. and the back fin thingy needs a little attention, but it looks fairly good. *thumbs up!

thanx for the input yes i see the boxy bit u mean at the back but im not putting lots of curves in because the image i was modelling from isnt curved and the F22 is boxy triangular! ive moved the tail fins up a notchNow can some1 tell me does the Editor make a DDS file out of the Textures applied?
