Ok... i installed RenGuard and first and second times i got it to work.... i also get it to work 10% of the time currently.... but 90% of the time i get the error "You need RenGuard to play in this server... bla bla bla" - Well i start RenGuard and run Renegade trough it, but still get the problem... now the thing is that i play via All Seeing Eye... but when i start my RenGuard it welcomes me as MY BROTHERS WESTWOOD ONLINE NICK.... which i really think is the cause for this problem.... now what can i do? Help anyone?

open All seeing eye and press F2 to get the options menu up. Now click on the games tab and select renegade from the list. Enter your player name in the box, and click ok. That should solve it.

RenGuard will always show the last nick that was played on. To fix it you need to log on as the nick you desire, log off and restart RenGuard.
