We played 4 games of clan match yesterday and one of the guys playing for there team kept getting kicked by Renguard everytime we started a new map. THE same guy over and over and not any of the otheres had a single problem. Is it possible that he is cheating or is this a flaw in Renguard because after getting kicked he came back to play the game. One more thing I didnt mention to anyone but I saw him kill a few gunner men while I was on his team in warmup and as he came around the corner killed them in like 1 second twice and later hes being kicked over and over again. After his first kick he usally came back to finish the game.

ANy ideas what happened

I suppose its possible he could have been using a cheat in the few seconds during/after a map loads or something? RG detects cheats instantly now though unlike previous versions, so I don't see this happening. Hmm.

I would of said oh well but after seeing the way he shot two gunners around a corner while I was on his team in setup map I dont think he had a glitch but it was a self inflicted onethat kept kicking him. One more thing to add to the story is that he told me in comands to "follow me" so I could watch him the way he shot.

At least I feel that Renguard working

No my member did not cheat at all.

He's having a lot of problems with his renguard because when he joins a game his renguard automatically disconnects and he gets booted from the server....any help on how he can fix this?

Im the guy in question,

now, before calling me a cheater you have to get a few facts straight:

- ask any player that knows me, if i cheat. then ask them if i have alot of kills after a match, they will both say no.
 - see on fly sniper server where i sometimes go and check out my recemondations (i have 1)
 - we have 3 out of 4 screenies, and in total of those games i had like 6 kills.
 - you said i killed 2 gunners, i know what buffermap you mean and it was an engenier and a soldier. (dont know wtf your talking about how could there b gunners nobody had enough creds)
 - why not ask me for a screenshot
 - its rude to call ppl cheaters when i just have problems with renguard.
 - if i had cheats installed renguard would say that i have cheats.
 - i often play on servers with renguard, somtimes i have problems, but other players too, it says "... is not using renguard anymore" this is a bug.
 - now if you have any other proof that i "cheat" plz post it here, if not i think an opoligy is in order.

Usually RenGuard kicks with a message... either that they're cheating, that renguard isn't running anymore, or that they're not on the renguard network.

True that. People join the servers all the time and go "But I have Rengu-*kick*" I don't know if they

just haven't set it up correctly or if this is a problem.

No one said you were cheating or even mentioned yor clan but you are correct about one thing, it was one gunner and one engineer and you recall that so you must recall that you killed both of them in about 1 second each. Hey maybe they were in the red I don't know but they died in one second. I also don't care about your screenies cause I hear there is other cheats besides Big Heads. I say fix your Renguard or find out what it is that's kicking you EVERY game. I would think you would not want anyone wondering if you cheated by fixing it like the rest of us. Not one out of the other 11 in that server had problems all the games we had. If one of the BA were getting kicked like that I would hope you would wonder too and tell us to fix our problem. How about trying to uninstall Renegade and reinstalling it with new Renguard?

and 1 sec in your dreams m8

and another thing if it were true of those superfast kills why didnt anyone complain?

your the only one from BA who saw me "cheat", ask around in your clan who those few gunners, euhm im sorry two gunners, oh no a gunner and an engenier was and ask him if he did die so fast.

(btw we were gdi that map n00bie, and nobody could afford a rocketlauncher)

you know what i think, your a sour loser...

Team up on me I see. No one complained about you cheating because we knew how you would react like you are now. How about you fixing your problem with Renguard. Seams you want to defend your self when no one said you were cheating from the start. Talk about fixing your problem in here be more concerned about that. By the way gunner - soldier who really cares you killed them in about 1 second. I watched it. Rather you were cheating or not I know what I saw. And about cheating all my guys are still here and keep the same names and 2k4 will snipe your arse the same today with Renguard on as he did 3 months ago.

I have no reason to lie about you, dont even know you and I enjoyed our match but I know what I saw and like I said before maybe the nod soldier was in the red of health if you recall me saying that in a erlier post but how about you try to do something constructive like fix your Renegade and staop your pi*sing and Moaning.

FIX IT!!

I think you missed the point so I will explain it for you. You say he cheats but if he shoots as good now as he did before Renguard came out with Renguard running, wouldnt that prove he has the skills and not the cheats. How about telling the guy with the Renguarded probelme to fix it so we dont have to listen to this sh*t.

Jeez... what a mess...

I have had to constantly reinstall renguard and the renegade just to get it working, it has messed with my pc, windows, modem, router....

Reinstall everything and get the newest renguard

Then hows about only playing on RG protected servers, then there's no argument. How can you cheat on a no-cheat server?

As an aside, on other games I have found sometimes I die a little too quickly, like I get shot once

by an engineer... I have tested this and I can't do it..

1 question... if you yourself do not cheat and never have then how do you know there is not cheat for a Nod soldier? You seem quite sure of this.

Calling me MsSpeed and making fun of my name and changing it for you to throw smack does not hurt my feelings. By the way I saw you playing on a Renguard server and it appears you got it working and I give you 3 cheers for that. Can you explain what you did to fix this issue in case anyone else has the same problem.

because there were a million posts about safe characters on a lot of forums, now maybe you were on another planet then (Venus?), I dunno but you should better read up on that.

If you ask a cheater a screenie, don't tell me you would ask him a screenie of a NOD soldier now??!! or maybe you do?? :rolleyes:

Knowing safe characters isn't a characteristic for a cheater, no it's common knowledge.

Now think before you post and just stop the insulting, you started it by calling me a cheater...
