simple solution... get a pair of sidecutters and cut the cord off your mouse. Now find somewhere else to put it where there is more room.

Flip the trackball inside the mouse upside down. This way you can make it go left by drawing the mouse to the right. If you have an optical mouse you're out of luck though

Umm...

pick the 6 oz mouse up and move it to where you have more room on the pad you lazy bugger.

Trackballs suck, they take up too much desktop real estate.
