Command & Conquer Renegade: Sole Survivor will be ready to launch once we finish getting the info about it back up on Dri Reign (thanks a ton to Crimson for getting us back online). We would like to have some download mirrors and dedicated servers ready by launch time. If you can help out with either of these two things by offering server bandwidth or download bandwidth, it would be much appreciated. For those interested in hosting the download, it is approximately 80 MB and is an executable installer. If you are interested in helping, please email me for more information:

SomeRhino@renevo.com

Thanks.

I'm sorry, I don't have the space now. It's too bad you didn't ask a few moths ago . Anyway, I don't have much space (40MB/150MB) (Free/Total). However, I do have lots of unused bandwidth. I can host something smaller for you that many people will be downloading. Also, if you need a blog or online education course, you'll know who to contact.

I can host any future updates for SS, but not the whole thing.

Freewebs? lol

Their max upload speed is capped at 3 KB/s

I have only 40MB left on my paid host, MySiteSpace. Music files, images, b2evolution, Moodle, and phpBB can take up some space. Especially Moodle, the files alone take up 35MB.
