You are hardly the most hated. Sorry to deflate your ego, but only the junior new guys REALLY care.

DDOS attack is not the same as the UDP exploit
xtrm2matt

its precicely why the patch will remain private because their are too many morons in renegade.

AlkalineDDOS attack is not the same as the UDP exploit
xtrm2matt

its precicely why the patch will remain private because their are too many morons in renegade.

Including, or excluding yourself?

If it's so private, then why post it on a public forum? PM's are these wonderful things you can use to avoid stating "LOOK AT ME, LOOK AT ME!"

CrimsonI guess someone is upset their fix wasn't such a good fix after all.

wrong my fix works fine :rolleyes:

ofcourse the UDP fix doesn't stop DDOS attacks :rolleyes:

The only one that doens't work is the one released by BHS. If you wnat proof I'll join your irc and show you, then it will be funny when you ask for it and I'll act like you do

It obviously doesn't work fine, as i did nothing but exploit that IP, by no means did i use ddos. I don't even have access to them facitilies.

What's funny is that Alkaline TRULY believes that he's intelligent.

You are just as bad as he is. Don't even start your NFD crap.
Only when I want to be. I am so much more intelligent than that moron. Anybody who has ever talked to me civily has seen my true intelligence. I don't claim to be extremely intelligent, but I wouldn't go as far as saying I have little. If you want to talk to me to see my real side, I'd be more than happy to enlighten you. I am brilliant when I want to be and a complete moron when I don't give a fuck. I enjoy arguing with Alkaline because his arguments make me laugh, that is why I proceed with starting shit up with him.

NFD is dead and I just havn't gotten around to taking it off of my signature. It's not that I couldn't keep it up, it's that I really don't care about it anymore. People are going to be morons and I have taken it upon myself to humiliate them in debate. If you don't like it then I suggest you don't read it. If you have to ignore me to achieve that, do as you must.

Well, I used my port scanner to try and crash his server and it doesn't appear to have worked. Meaning the fix Alkaline applied works. Once again, the BHS patch was to protect against a DIFFERENT kind of attack though both attacks use UDP packets.

I just received the fix from Alkaline so I can really test its effectiveness.

their still remains some problems with this patch, once it is completed I will give to blazer & mac & post here.

I think the problem is distributing the entire server.dat file probably has some copyright issues so it will be a patch instead.

for linux, use a hex editor:

```
file                        offset      original    patched
renegade_server_1037b_RH7-3   00327AEB 00          03
renegade_server_1037b_RH8-0   002DAD94 00          03
```

Remember this is not the final version thier is still a problem with the admin port which will be fixed
soon
