I made a Javascript Drop Down menu in OpenCube Visual QuickMenu Pro v5.4 (I am looking for v5.1 because it is crackable if anyone can help me pm me.) but I was wondering if someone can duplicate this drop down menu by themselves so it won't have the error about being registered.

Send me the .js files and I should be able to remove the popup.

lol, I'm thinking of the wrong language here.

:stern:

z310nova-studios.... lol

Whats so funny?

I could probably code a web based application for you guys that would input data and then it would generate the .js file and the html, but im REALLY short on time.

If i did do it, there would be a big delay.
