You probably have the version mismatch bug. Remove all .pkg and .mix files from your data folder, and you should see some servers.

You can't play on any servers if you remove all the .mix files...

Sorry, but there aren't any up right now. We pulled ours because I was losing money too fast. Unless we can work out some type of donation system there won't be any online for awhile.

xp, if you are not planning on running the server do you want me to start it? I don't think thier is a need for 2 servers when thier are only a few players.

I have a spare 2.8 just sitting. But if I do start one they you shouldn't host a server because thier

are not enough people to fill 2 servers.

let me know.

also, what about the m0x.mix maps ?

also if this post is in breach of our agreement i'll edit it and remove.

Go for it. I just don't have the resources to do it right now.

Quote:also, what about the m0x.mix maps

Working on them.

[REHTSpirit]You can't play on any servers if you remove all the .mix files...

I meant .mix files that didn't come with renegade or SS.

conman231sole survivor sucks anyways

Doesn't to my friend, he seems to like it a ton more than Renegade itself

I kinda like it also, a very nice variety of modes for me to choose from when I'm bored :rolleyes:
