<http://www.shatters.net/celestia/>

Check it out, it's very cool. YOu can go anywhere in our SOLar System, other stars ETC, you can even look at Solar and Lunar Eclipses in real time, or faster or slower. YOu can take a peak at the moons of jupiter, the International Space Station (ISS), Hubble ETC ETC. THis program is very cool.

IceSword7My highschool astronomy room has something like that except its a huge circle shaped screen on the ceiling.

It's called a planetarium.
