Hi, i told you my problem:

When I launch C&C ren, Renguard launch itself at same time, i'm connect to any server and when i'm connected, the server says that my SN is Incorrect but when i Launch Renguard, it don't says that my SN is incorrect, I don't know the mistake, Plz Help Me

Your serial is not being verified by RenGuard, it just checks if it looks like a valid renegade serial. Thus, you can log into RenGuard

However, when you connect to a real renegade server, it will verify your serial, and it finds that it does not work for some reason - it may be already in use, or if you have a german 10 Euro box those serials do not work on GameSpy Arcade for some reason..

Thx mac, the pblem was resolved now

And if your work on Renguard Team, I can told you that the program had some faults because some cheats are still running.....:/
