this is the bug i get all the time

and it cant be that i have any cheats, mods, sound mods and maps this is my data folder

and i havent installed anything i installed renegade then the patch logged in on WOL and installed renguard and this is what it gives me :rolleyes: :rolleyes:

"Not Responding" generally means it's died of something, or waiting for you to do something, so that could well be why.

Also why are you trying to run it twice?

Failing that, lose XP

It is your firewal interfering with RenGuard. RenGuard needs internet access. Configure your

firewall to allow game.exe to the internet.

The Norton Firewall is not compatible with RenGuard.

well next version needs to have some error handling, not just a "freeze" if the port is being blocked.
