Nothing more than the extracted radio command *.wav's from Renegade, but when you put them in your RenAlert data folder, the radio command audios are restored. I usually dont have time to constantly monitor the chat area on the top of the screen so I find them very helpful.

So while I took the time to extract them all, I decided I might make it convenient for others who want to do the same and post them online.

hmm, well if Blazer gets his ass moving, we should have our own russian-english and english ones.

so they have either a russian accent, and maybe a german or what would be awesome, abritish accent.
the classic british one would rock!
