I was working on a Assault map (SP mission to assault) when poof, the preset list was gone. The only thing that helped was restarting LE.

This happens sometimes to me but it`s anoying, does anyone know how i can fix this?

Yeah, I don't have this bug, but my Task Bar abbsolutly f00ks up from time to time.

I find the best way to fix the Task bar bug is to load up the Task Manager (on XP), it returns it back.

Not sure if this will fix the preset bug though, i never have this trouble.

Andy.

Did you try pressing other buttons on the menu such as instances and then switch back to presets?

I guess magic has removed them from your computer. Ive had that problem except my whole HD contents were gone after I hit delete over every folder.. I was like "what the hell? MAGiK!!1".

Reinstall LE.

Eheheh. :rolleyes:

It's just the annoying messed up dialogs-bug.
It makes parts of the menu dissappear or overlap.

Restarting LE works.
