just keep testing the different Alpha settings(in the nvidia window) when you save your dds. Thats what I normally do if they appear blank in game

I think I've done everything right but when I try to use it ingame it shows as a big block, and when i re-open it instead of no back ground it is now all white, any sugestions ?

Edit: Im using paint shop pro 8 if that helps.

Does anybody know where to get this Reticle?  
i had looked all over and i can't seem to find it help  
thanks
