yo,

me and my clan want to host a renegade server but when we host the server isn't been seen on GSA. we don't have rengaurd jet gause we just want to look if it works. can plzz someone help us.

I know that this is a rengaurd forum but realy plzzz we need help.

greetz cyclops,

you really should of posted this at the Win32 FDS forum.

I don't know off the top of my how to do it manually, but if you re-install the FDS again, you have 2 options, GSA or WOL, choose WOL

lol,

its a linux server?

and how are u going to host it?

with (L)FDS?
or by installing renegade and then host a server (like normal client hosting)?!
