Looks fairly nice, I don't particularly care for all the red, and your RenStrike banner, logo,
whatever, doesn't really stand out since it is red just like everything else. I like the stars, but it just
doesn't seem to fit with everything else. And the lines to the left and right of the content boxes,
one of the left ones is to high and abotu 1 px to much to the left. The right one is to far to the left
about 3px, and way to short. Your forums link also does not work. If you want a screenshot of
what I mean about the lines, just post back here, it may look fine to you though, since most people
use IE, but I'm using FireFox and it looks wierd.

Is it a crime to give constructive criticizm, I coudl have just said, It sucks, or Looks like a pile of shit, but no, I gave you feed back to tried to let you know the forum link doesn't work, same with the other member, but then you yell at us for trying to help you . . . and I was also jsut trying to let you know of what I thought was wrong with it, or didn't like with it. BTW Here's the picture of what's wrong . . . http://www.egmods.com/images2/rencjb_prob.jpg
