---

We've recently set up this service on our server (had several spoofing attempts lately) and one of our members has forgotten their password. I searched through the forums but was unable to find a way to either delete the registration or retrieve the password. Is there a way to do this? (Also is there a way to change a password? [in the event that it's actually said in the game])

Thanks  
~Anubis

yes, trough the brenbot database file (brenbot.dat)  
Open this file with the sqllitemanager.  
You can download it here: <http://renmaps.neronhosting.com/sqlite.zip>
