Gum is the clan

Screenshot of them saying they cheat

ANd we were playing them, also they only made hs, we were next to each other and died in 1 shot..

THEy cheat for sure, here is the proof..

Please have the renguard community to ban them..

You are pretty retarded if you think they cheat because of that. Did you try locating them on Renguard? Sure Renguard doesn't stop all cheats, but nobody on CW knows how to bypass RG.

You are an idiot. You thought I cheated because I had a 90% hs ratio against you in some random newb server, I told you I cheat yeah, just so you would leave me the fuck alone. Then I join, you get me banned because you are butt buddies with the admins, I join up again, do a stupid test for you, take 10 screenshots, and even add you to MSN and you are still on my MSN. Only then do you think I dont cheat, and after that I own you some more in the SAME game and you want more tests and screenshot because apparantly now I can load bighead and final ren in the middle of a game without leaving. I gave you more ss's over msn and only then were you satisfied. Here is an idea for you, its called occams razor. It is a pretty simple "law" that says, in anything the most simple solution is often the most correct. In this case you are playing against some of the most skilled players in all of Renegade and you have been sheltered by ladder games, maybe so much as to think you are the best sniper ever. You play them, get beat horribly, even tho they are on Renguard and are positivly not cheating because I know them personally. You accuse them of cheating, like you accuse anyone better than yourself. Occams razor kicks in, what is more likely? They are cheating even though you accuse anyone who is better than you of cheating even if they prove they arnt (apparantly a Fraps video couldn't convince you that I dont cheat either), or that they arn't cheating and you just suck? Your call newb.

punkun21Hmm where do you get your 90% figure...

Well, let's make a calculation, using 1 number that isn't just made up and let's say that everybody on the forums is in a way talking the truth when using numbers. Yes I'm bored

10 % percent doesn't cheat in this community. Now let's look at this number 2617 players have logged into RenGuard in the last 24 hours.[/b]

Let's say all non cheaters run RenGuard and have played the game in the last 24 hours, that means that 10 % of the community = 2617

wich means that the whole community is 26170 big. Now this number could actually be not far away from the truth, because icedog90 said:

Quote:There are currently more than 25,000 thousand ranked players in Renegade right now

What numbers do we have now:

10 % of comminty = 2617 or rounded 2500

100 % of community = or rounded 25000

number of ranked players = 25000 (so the 100 % could be right)
Now 90 % of community = 23553 or rounded 22500

This would mean that there are actually 22500 people cheating. That is a lot of cheaters.

Everything number of course is just based on assumptions, and I have some serious doubts they are true.

The bold part: That doesn't have to be cheating, if 2 people stand very close to each other, and you shoot in the middle of their heads there is a big chance they'll die both with a Ramjet bullet, (it shoots right through the head, it can kill people behind you too, along with you.)

BTW, the 'confession' just looked like sarcasm to me..

How about just play on Renguard Protected Server? If you were on a protected server then I take it back. I just cant figure out why people just dont want to play on a protected server. By the way where is the latest update for Renguard. I thought you were releasing that months ago.
