Guys, this is just nutz, someone do something

Silent Kane --{}----{}-- says:

Back

Dante says:

mmhmm

Dante says:

<http://www.renegadeforums.com/viewtopic.php?p=106715#106715>

Silent Kane --{}----{}-- says:

lol

Silent Kane --{}----{}-- says:

I don't think stuff like that is good on a public forum that is visited by kids

Dante says:

i imagine it will get deleted, but oh well

Dante says:

neither is 90% of the content, but eh, what can you do?

Silent Kane --{}----{}-- says:

The girls are ugly anyhow, lol

Dante says:

its just a pissing contest between you and jonwil, and its quite annoying

Silent Kane --{}----{}-- says:

His stealing is annoying.

Dante says:

the lack of sharing public knowledge to claim something as "yours" is annoying, quite honestly

Silent Kane --{}----{}-- says:

Most of the stuff is quite dangerous and most of them wouldn't understand how it works.

Dante says:

yes, most

Dante says:

but still, its annoying to see "its for our mod, look how pretty it is"

Dante says:

and dangerous = crashing peoples computers, not cheating in a game where an anti-cheat app is supposed to be maintained

Silent Kane --{}----{}-- says:

I can easily crash the game of other players

Dante says:

so can i

Dante says:

without your code

Silent Kane --{}----{}-- says:

The code makes it easier

Dante says:

not much

Silent Kane --{}----{}-- says:

The code snippet that can crash the stuff is used almost everywhere

Dante says:

just saying i see no point in "hiding and cowering" information from other people when plenty of people can put good use to it

Dante says:

main reason i left the game, no one like sharing, its like you all missed kindergarten

Dante says:

not helpful, not informative, only blaming, flaming, and shitting on other people

Silent Kane --{}----{}-- says:

That's another problem. Lets take the dialog stuff as example (4000 lines of code). I can see n00bs do stupid shit with it

Dante says:

don't use that word around me, i have more then a 4th grade education, and you can use the word idiot around me

Dante says:

yeah, they will do stupid shit with it, crash there computers, piss and moan about it, blah blah, but in the end, someone might do some good with it, and expand on it more then it already is

Silent Kane --{}----{}-- says:

I don't know anyone besides me that can understand how it works/how to use it. It's quite hard

Dante says:

and im pretty sure you aren't the smartest man in the world

Silent Kane --{}----{}-- says:

I'm not. But most people in the renegade community probably don't even know what a virtual function table is

Dante says:

and im sure that there is a shit load of stuff that you don't know about, you can't "not help" by assuming everyone is an idiot, and you are smarter then them

Dante says:

i remember when you couldn't code yourself out of a paper box

Dante says:

and that was... less then a year ago

Dante says:

so it can't be that hard, if you learned it since then

Silent Kane --{}----{}-- says:

I can learn fast. I was able to learn everything required for the dialog stuff in a half year (that includes assembly and C++ knowledge)

Dante says:

ok, so you are the smartest person in Renegade?

Silent Kane --{}----{}-- says:

Most likely. And I will think so until someone does better stuff than I do.

Dante says:

thats sad

Silent Kane --{}----{}-- says:

Nobody can prove otherwise

Dante says:

lol, you go on with your bad self mr. genius, let me know how that works out for ya, k?

Silent Kane --{}----{}-- says:
It goes fine so far.

love it or leave it, this is what is "driving" your modding outcome.

Self-Centered jackass. You don't know anybody else that can use the code because you don't give anyone a chance. If you honestly think you are the only person in this entire community who knows how to program and has had years and years of experience behind them, then you're living in your own little world.

Nor did I. I said that others here would know exactly how to use any of your work, perhaps even to a higher degree than you yourself, and in return, give everyone from the simple map maker to the tc mod makers the ability to have infinite purchase terminals or more advanced radar screens; but, that will never happen, because you feel nobody can do this. That is where you are wrong 100%.

If you opened up a little and gave back to this community, you might find it more enjoyable.

And you're going to whine about him not giving away stuff?

Funny coming from the guy who says "all this community does is blame people blah blah" you end up blaming him and starting public threads you know will cause bashing sessions.

If I were SK, I wouldn't release the code to anyone. Just leave it sit there on his computer to spite all of us since you seem to think that you have some kind of divine right to everything made in this community. "He made it so that means I have to get it too! AND IF HE DOESNT GIVE IT TO ME IT MEANS HES A BAD BAD MAN AND ILL CALL HIM THAT CUZ ITS MEAN TO NOT GIVE ME WHAT I WANT"

Yeah, it does seem like people missed kindergarten. And a few other grades.

I agree... grow up. using someone else as a scapegoat for a decision not to do something is about as childish as you can get. I remember I did something similar way back in grade 4 (if your in grade 4 though, then I appologise for thinging otherwise). Someone from a group made fun of me, so no one in that group was allowed to participate in the function I was planning.

As far as you thinking your the best without evidence to back it up, thats just as childish. There is nothing stoping you from proclaiming it, nor having it be true. Just if your going to continue with that claim, prove it.

Subject: :sigh:
Posted by [vloktboky](#) on Mon, 09 Aug 2004 20:10:35 GMT
[View Forum Message](#) <> [Reply to Message](#)

You always seem to take the point of the topic and change it just a bit to make the other party look bad.

Yes, if he were to release the code, we would all be grateful for it. That's the whole point of this argument: not sharing. If jonwil decided not to share his scripts.dll stuff, your mod wouldn't be what it is today, at least it would be x months behind schedule. He has code that can very much change the course of possibilities this game has to offer, but his refusal to give anyone the chance to make that change marks him as an asshole in everyone else's eyes.

If you are going to take the time to show off your work, then give people a chance to use it. Even if you give it to one other person outside the parties you are affiliated with, it could make a good difference.

On a side note: I find it funny how you are the only one defending him, ACK. That whole "opposites attract" thing has nothing on you two.

If JW writes code with the same functionality as SK's, he's stealing.

What a fun community.

We never needed Scripts.dll to do the base work we have. All the "extra" things are what Scripts.dll is necessary for. Even if JW didn't do it, SK wasn't that far behind in making it work.

I don't care if you think of him as an asshole, that's pretty irrelevant since you're never going to get anything from him if you're going to whine and complain that you didn't get anything to begin with. Beggars can't be choosers, and demanding something from someone with no compensation usually makes them want to tell you to fuck off.

Pi, there's a huge difference between "asking" for something and "whining" about it.

Example:

"Silent Kane, could you please consider releasing your code? We would all appreciate it."

^ Ding ding...

"Silent Kane, you're a fuckhead because you don't want to give it to us. We all deserve it but you're an asshole who thinks you're better than everyone because you won't give out code."

^ BZZZZZZZZZZT..

SK wont even cooperate with his own team members at BHS. He is one of the reasons, why CP1 is being delayed so long.. You know, refusing to finish his work because he fears his code might be stolen again.. and I asked nicely, getting the response "no time", and then he starts doing something completely new. Talk about not setting his priorities straight. The community is waiting for this.. *sigh*

So much for working in a team.

Funny, I do believe SSAOW is DA with everything in it that doesn't require DS to function, which is work that I can't release because it isn't mine

Besides, the server-side sniping, inf only, and ctf mods more than make up for one little private mod, which the majority of its code has already been given to the public..

My reply was to Khold's edited/erased post. Ignore it.

I released my mod when I felt it was ready to be released. It just so happened to fall around the same time that xptek stole DA. If you look at the timeline, his stealing it almost caused me not to release SSAOW completely, but the words of those who are nice got me through that and prompted me to release it anyway.

We also had piss poor relations with everyone else. We both hated one another, so it is only logical that one side would not want to help the other in any way, shape, or form.
