I know that this is probably old news...or at the very least, a very n00bish question, but does anyone around here know if Red Alert 1 is playable on Windows XP? I used to play all of the time, but my cd got scratched, so I threw it out...now I have a hankering to play it again & was gonna look for a copy on ebay or something, but there's little point in that if it's not gonna work on my comp anyway.

And if it doesn't work, will Tiberian Sun run on XP??

Thanks.

Yes, RA will work on XP, Tiberian Sun will too. If you have your Red Alert CD's, go here:
<http://dynamic5.gamespy.com/~ra2sw/index.php?showtopic=7>

If you don't go here: <http://ra.afraid.org>
