If you need some help setting up BRenBot (basically any version) i suggest you read this:

<http://www.mp-gaming.net/index.php?act=brenguide>

When running BRenBot 1.41 you also need to configure your ssaow.ini
you can find pretty detailed reference, custom map vehicle crate coordinates etc over here:
<http://www.multiplayerforums.net/index.php?showtopic=694>

this is an old topic you 2....

fanmaps moved to a different site address months ago, so I suspect the guide will have moved with it...

EDIT: As i thought its now at <http://www.mp-gaming.net/brenbotguide.html>

Its some DNS problem thats been going on for a while now, its ghey.
For most people the site seems to work fine but for others it does not.

Also, for some people www.fan-maps.net works but www.fan-maps.com does not.
For some people fan-maps.net works but fan-maps.com does not (without [www.](http://www.fan-maps.com))

I can only suggest for now to try all possible domains:

<http://www.fan-maps.net/?brenbot>
<http://www.fan-maps.com/?brenbot>
<http://fan-maps.net/?brenbot>
<http://fan-maps.com/?brenbot>

If none of these links work for you then there is not much we can do right now to fix it, its a problem with the webhost and DNS etc :/

The .net ones both work, neither of the .com ones do. Anyway, isn't it about time you updated that guide for 1.50?

The guide is also on the renegade wiki, I made a few changes based on BRenBot 1.50, but it still needs updating really..

http://www.renegadewiki.com/index.php?title=BRenBot_Tutorial
