Hey all. Today is the day I'm going to upload the Expansion Pack (Well, you can call it Mod but it expands all multiplayer maps, so it can also be called as an Expansion Pack) for download.Just makin some updates, here they are:- GDI AGT, Nod Obelisk, Airstrip and the Weapons Factory now have more life.- Machine Emplacements have been added in almost all building's roofs for manual defense.- New background. Now the scenario is in the evening.- (Updated) Destroyed vehicles have been removed because they were causing too much lag. Trees have been added to replace the vehicles, since they dont cause so much lag.- GDI and Nod Helipads have been added.- All secret units/vehicles now have their own Icons, with their respective image.- MOD in two versions: with AirCrafts and without AirCrafts, but both versions have roof access for all buildings.- Both bases now have more defenses, new walls have been added in strategical positions in the map.Hope you like it, here are some pics of the Mod, that is already been uploaded!!   Keep makin new strategies for assaults on enemy base, sice new walls have been added to avoid those!   Hope you like it -- ITS COMING!--ALLGUSTO--

This Expansion Pack is based on modifications that Renegade users asked me for. So, if you have any other idea of mods for C&C City or any other map, post it here or send me and e-mail > andre-figueiredo@uol.com.br --ALLGUSTO--
