In Blackhand Studios Core Patch 1 there is a english strings.tdb file that fixes various things.

- 1) It includes all of Aircraftkiller Sound Fixes (Repair Pad Under Attack/ Tib Silo under attack) etc
- 2) It turns "Blackhand" (all blackhand characters) into "Blackhand Sniper", LCH and Stealth Black hand.

This works fine - however we can't use the english strings.tdb for german or french installations, this overwrites the whole language. So we need localized versions. And I would like that localized users can benefit from the fixes as well.

I have asked Neosaber and Aircraftkiller for details, how to do this and forwarded this information to a german modder who wanted to modify the german strings.tdb. however, he failed since he couldn't import a temps20 file that had the temp presets of a modded map.. I dunno.

Can anyone experienced with enough knowledge help me on this. I can supply original strings.tdb files. I'm no modder myself, so I am not much helping here

Thanks for your support - I hope to get this done for CP1

Just a thought here. You may want to talk with Laeubi about your language problem. Not saying he can help, but he might be able to.
