My server used to run 24/7 with no problems, but now every once in awhile it will crash, and kick everyone out and start up again.....

Subject: FDS Crash?

[View Forum Message](#) <> [Reply to Message](#)

Yep, this also happening to all the FanMaps servers recently.
Some n00b is probably responsible for it. This guy joined the server a few times as well and there is no doubt in my mind he or she has something to do with the recent crashing of the FDS's.
H4ckBot** Screenshot

They used to run fine for a long time. Now they seem to crash at least 2 or 3 times a day. They just quit to desktop and dont restart at all or they do restart and get "Failed to create channel" for over a freaking hour.
Its very annoying.

I hate n00bs.

I dont see whats funny about that really. We spend alot of money on these servers to provide people a (hopefully) nice place to play at, and some scriptkiddies and n00bs think its funny to crash their servers. Its just 1337-gay.

here i got other problem, on an other server of me:

Quote:[16:32] 11Player wow my name will be long you know like

longgggggggggggggggggggggggggggg then like i join and like bang bang bang the server goes dead and you all start crying and i laugh at your faces like whahahahahah and bang bang bang the server is dead.... joined the game

[16:32] [BR] Removed a player with excessively long name

[16:32] 9Initializing GameSpy Mode

[16:32] 9Channel created OK

[16:32] 9Loading level C&C_mesa.mix

everyone gets kicked and server restarts...

is there cure for that?

We are having the exact same problem on our two clan servers. It just started doing this a week or so ago. Before that the FDS would run all day with no problem now whenever I get home from work the server has crashed and I have to "quit" it and start it back up..

[View Forum Message](#) <> [Reply to Message](#)

ya ive been having this problem with my server for about a week now and ive tried almost everything to stop the shutdowns. the only guess i have is that some n00b that was banned from some servers for cheating has decided to get back at the servers by overloading them with packets causing them to shut down. if i can find the exact reason or the ip of a person doing this i will post it as for all other servers having this problem can ip block that user so he cant attack the servers as easily. im also getting my server changed to a diff ip and diff server comp as to maby bypass the bot that is sending the packets to set ip's. if this works ill post as such.

Well guys and girls, seem like there is a lot of this going on, and yes its driving us all crazy. I just hope its not just one guy doing this, because if it is we should all just give him a blanket party and beat the hell out of him ..lol .just a shame we probley will never know who is doing it that is if its not west wood just trying to get rid of Renegade. we all know they hate to suport it since the game is fairly old and maybe they are just trying to make room for new games

Yes, our servers have been "losing connection to WOL", and are all hosted by SM. It mostly happens in the early morning hours for us, but we've seen it happen during prime time and the

late hours.

[A51Smokie[NL]]here i got other problem, on an other server of me:

Quote:[16:32] <Area51> 11Player wow my name will be long you know like longgggggggggggggggggggggggggggg then like i join and like bang bang bang the server goes dead and you all start crying and i laugh at your faces like whahahahahah and bang bang bang the server is dead.... joined the game

[16:32] <Area51> [BR] Removed a player with excessively long name

[16:32] <Area51> 9Initializing GameSpy Mode

[16:32] <Area51> 9Channel created OK

[16:32] <Area51> 9Loading level C&C_mesa.mix

everyone gets kicked and server restarts...

is there cure for that?

There has been a patch for this for over a freaking century, where the hell have you been?

I have uploaded these fixes to the fanmaps website, so i can 'quickly' give it to people i know who have troubles with the server or cant remember the 'original link' to download it:

BHS FDS Patch

Alkaline's Server.dat UDP Fix

Scripts 1.9.1

Vloktboky SSAOW

SQLite Manager (BRenBot.dat editor)

These are the ORIGINAL files including source code and readmes if there were any. Again: Its hard to remember all the links to the official downloadlocations , that is the only reason i uploaded them to fanmaps.net

Until i get permission from the makers of these files to host them on a public base i will not link them directly on the FanMaps website and only use this as a 'quick reference' for friends and to give people a place where they can download it. Rather than having to spend a freaking hour looking for the official downloadpages.

the problem also has come up that when i just start the server and like 2 to 5 minutes after its been up and no ones in it....it crashes as well and starts back up again.

Subject: FDS Crash?

Posted by [TbouncerT](#) on Fri, 27 Aug 2004 03:56:17 GMT

[View Forum Message](#) <> [Reply to Message](#)

Im having the thought that someone is getting in to the servers somehow...because i just looked in my RenegadeFDS folder > Server, and i see files missing...like the server.ini files and all....also i right click on the dedicated server icon on the desktop and the target isnt the .exe file its....C:\westwood\renegadefds\install.log. and another weird thing is that there is 2 sets of renegadeserver icons in the server folder.....am i just seeing things and retarded...or what?

Subject: FDS Crash?

Posted by [zunnie](#) on Fri, 27 Aug 2004 04:00:38 GMT

[View Forum Message](#) <> [Reply to Message](#)

Quote:the target isnt the .exe file its...C:\westwood\renegade\install.log

Thats normal. If you want to proof: Uninstall FDS, delete registry keys and remove the Folder manually and then Reinstall the FDS again and check shortcut

Man I'm moving back to gamespy... this is some gay crap.

This some german/euro dude guy going this, its some WOL sucks possie that is causing all the problems.

While 10-12 maps in rotation this really isn't an issue... but when you get to 66+ maps this is hell.

I know this because even Generals and RA2 are having some problems...argh all you people just move to gamespy plz...or xwiz or something wol is getting to be a real pain.
