Whats the possibility of making a wol broadcasting app similiar to wolspy but it does the opposite, broadcasts gamespy players in wol.

I say this because a couple of things can then happen:

1, BY FAR THE MOST IMPORTANT: Say good bye to the wol connection loss error. Since server is gsa based it won't have to be dependant on wol buggy irc.

2, cdkey banning: finnaly have the feature gsa servers have but wol was denied, no longer would you be at the mercy of the dreaded dynamic ip.

3, gsa>wol but i won't get into that...

I can't play on GSA.

Everytime i join a game i get something about CD key shit.

I DID buy the game.

And there are a lot of people that have the same problem like me.

I agree with the first two 100% but the third only partially because:

GSA 'infrastructure' is better than WOL's indeed, but:

- those long names man.. <pukes> and
 - those special chars <pukes> and
 - not having the oppertunity to see who are ingame be4 joining <pukes> and
 - having to quit whole of renegade just to switch server <pukes>
 - kicking someone is always a qkick <pukes>
 - alot of players have the cheap-ass version of Renegade and cant even play on the server lol <pukes>

I think I asked djLapop about this when he released WOLspy. He said that showing WOL servers on GSA was relatively easy, but doing it the other way around was nearly impossible. It's a shame, because then we could have Linux servers on WOL like we thought we'd be getting all those years ago...

Gamespy = sucks.

Here's why.

A) It loads tons of spyware crap on to your computer. If you have Gamespy installed on your computer, you might as well light the hard drive on fire. Unless, of course, you download a spyware removal program.

B) It takes twice as long as WOL to load and/or do anything.

C) Gamespy = sucks.

I havent encountered any gamespy "Spyware" with any spy removal programs ive used. . .

The extras 15 seconds to load, boo hoo cry about it

GSA>WOL because of the name length also, no 9 cahracter limit no caps or character restrictions

GSA>WOL again because frankly I believe that Gamespy cares more about Renegade then EA ever will.

GSA sucks. 15 seconds does mean a lot. 15 seconds could mean the turning point in a game.

The name length is annoying. UGIN2 was turned into a WOLSpy server for a few and it was annoying as hell to see my scores fucked up because morons decided to add stupid characters and words to their names.9 letters is plenty long enough.

EA sucks, plain and simple. That doesn't mean that GameSpy cares more for the game, they just care more about getting more members.

you can restrict how long names can be on gamespy via a server patch, you can also dissable people form charaters not easily accesable on the keyboard (unicode chars)

but I heard bhs wanted to do this with thier bhs.dll so I didn't release it... Also it seemed to have a conflict with wolpsy for some reason (ever see those wierd wolpsy type wierd commands to the fds)

You can use capital letters on your WOL name. Now, if you don't know how to do it, that's your own problem.

PS GSA sucks, it's too easy. WOL provides a more CHALLENGING experience.

You don't know me. You can't say that I have no life. I try to hang out with my friends as much as possible, but sometimes I can't since school and work get in the way of making plans. Plus, I'm not the one who edited somebody's post in that way. I didn't say "somebody shove a dildo up your ass" now did I? I may have said "go back to butt fucking your GSA buddies" but that was after the fact that you edited zunnie's post.

I'm not getting upset, dipshit. I always swear. It's just the way I am. Also, when I bought the game, it wasn't \$10 it was \$50. You're a fucking n00blet and know nothing about the community, so piss off.
