These past few days I have been trying to play multiplayer and I have renegard.

when i launch renegard i get the message:

[10] Trying to connect to server #1...Failed

[10] Trying to connect to server #2...Connected

[10] Server is not responding. Trying next one

[10] Trying to connect to server #3...Connected

[10] Secure link established.

[10] Welcome to RenGuard , eyessnipe!

[10] To launch Renegade, please click 'Renegade'.

I see the failed things but I'm not really sure what they are, anyway and then when I click on renegade and I click on multiplayer internet and then I click on Westwood online then I click on advance game listing and I get a pop up that says requesting server list... then in like 30 seconds it says LOGIN FAILED OPERATION TIMED OUT. It does the same thing for chat and quick match.

Can someone help me out here I played online many times and I never had a problem
!!!!!!!!!!!!!!!!?

...You're living under a rock. WOL is down. From what I heard, WOL will be down for a week.
