icedog90If I were to turn down my resolution down to yours then I'd get the same FPS. :rolleyes:
Turn up your resolution and you'll only get like 120 FPS.

Mr. icedog,

Sorry my friend, but those numbers were on 1024 & highest resolution allowable in Ren options. I can perhaps get fraps video to show. Granted, I took screenies of the upper end of the spectrum for fun, but it pumps out some impressive rates. Avg is usually around 110 in Renegade.

Specs on hers are Asus k8n-e deluxe board w/ NVIDIA nForce3 chipset, AMD 64, dual raid sata HD 200G total, X800 256mb ATI Pro card, 1G pc3200 ddr ram, Antec SuperLan Boy case & ViewSonic 19" A90f+ CRT.

I like that case BTW, icedog, I almost got that one for her - slick.

Here is my setup Normally I have the monitor on the right a bit further over, but my father needed my monitor extension cable, so I just dragged the monitor over a bit. Kinda makes things a bit off balance on the desktop, but whatever, lol I also usually have a small TV just to the left of the LCD on a composite out, so usually I am running three monitors, but like the monitor extension cable, my mother wanted to borrow it, so I am down to two, lol

What you don't see is the 360 watt subwoofer setup behind the computer, yes, I am running a home made 6 speaker + woofer setup

AircraftkillerI don't clean often, but when I do it all looks nice and tidy until I don't feel like cleaning again...

I have the exact same mousepad. And on my other computer I have the exact same mouse. and in my room I have the exact same dam speakers!!!!!!!!!!!!!!

I dont know where the mousepads from though.. I got it from my friend rebecca who everone says is my girlfriend.

We have a home office so I will post all the pics.

Heres my server(left), moms computer/brothers/mine(never use it) (right).

Note how I only have one monitor. I got my parents to buy me a \$100 switch so I could have my server and my moms comp on one switch.

Heres my dads comp. The router and modem are also under there.

Heres my dads monitor.

Heres my dads laptop.

And heres the beast. This was our first computer. Its an old windows 95. I tried to reformat it about 3 months ago. I didn't get the cd rom driver backed up though. I cant reinstall anythign so now its just sitting there. Sorry about the pics for this one. my brother has models all over the front of this thing.

npsmith82majikentnpsmith82majikent...

The poster on your wall (top right of this picture you posted)
<http://www.n00bstories.com/image.fetch.php?id=1314439143>

I seriously want the poster or another one the same. Where'd you get it? If you can still buy it would you buy one and ship it over to me if i paid you?

I'm pretty sure it was bought at a Hobby Lobby... but it was quite some time ago. I will pass through there on one of my days off coming up and if I see it I'll grab it for you. That'd really be appreciated.
Keep me posted, thanks.

UPDATE: I found it in the store (Hobby Lobby), but before I tried mailing it to you myself I got all the info on it I could and decided to see if you could purchase it online and get it shipped to you before I tried.

Info:
Name of Picture: Lightning Over Lake & Mountain
Publisher: Portal Publications LTD
Item #?: SP 203

I found a site that had it and looks to ship internationally:
Lightning Over Lake & Mountain

Hope it works out!
