Hey guys, just an update, seems my webhost switched IP addresses on me without notice, so I have to wait for a DNS update, then the site will be back online.

Sorry about any issues.

[BBFFoss]i have a question, how would i go about using a custom image for stats?

When RenEvo comes back online, go to the stats forum and there will be a discussion about custom images, read the whole thread and it will clearly explain the process.
