Hi, i finally found my cd but i only found the game cd. So i installed the shared ww internet componets and i made it in but now it says my serial is invalid. I tried to reinstall the game but it gets stuck at 43% and it goes to a black streen so i have to reboot. Is there a registry key that i could input it into or somthing?

I think EA Games has an address you can email to request a new CD-key, I don't remember what it was.

I need a serial for YR. Or an email address for EA to talk to them about it. It's amazing how unhelpful their entire damn site is!

There is a program out that can change your serial, i believe x210 from that apax team group made one, it works, but it also turned your PC into a ddos bot, so.. meh.
