Obvisouly, your game2.exe is corrupt or missing. The CP1 beta did not touch this at all.

Quote:
From the RenGuard FAQ:

I'm getting the message: "CRC Mismatch Error"
This error message means that game.exe and game2.exe are the same file. This may happen if you try to install with the installer and the safe installer. You may need to reinstall Renegade to replace the now-missing game.exe.

Obtain a new game2.exe (e.g from the how to install renegade thread here) and put it in - should work just fine.

rename the game.exe in this zip to game2.exe

http://download.renguard.com/rg_downloads/English_GameEXE.zip

Yeah it's ok, my system got messed up in the early betas too, so I just bought another PC and apartment with new phonelines (You know, just to avoid any electric distortions the issue might have caused), and reinstalled Renegade. Works well now, I guess I just freaked out a little.

:crazy:
