I got GameFace 2.0 software w/ my new video card & thought it looked kinda cool - Any one tried this?

See link- <http://event.asus.com.tw/gameface/en/>

Well, I can't really see or find out what this is when there are FLASH POP-UP ADS TAKING OVER MY SCREEN. What kind of site would want to block everything with Flash pop-up ads? This is ridiculous.

I got that with a radeon 9200 SE a while back, it's asus exclusive. was that picture you playing or an SS from the site?? I think it lets you see your friend on webcam while you play. you can communicate with him etc.. just a sort of teamwork-orientated program. i'm sure it's easy enough to use
