AircraftkillerThese graemlines (commonly referred to as "smilies") are for staff usage only, so don't bother trying to figure out how to use them.

Yes, I'll be using them quite a bit in-game... They appear over our head when we call for them to appear.

I like the 'pow'... Rofl

In my opinion the "reborn sucks" thing just shows more immaturity in the Renalert team. However, the rest are pretty humorous.

Are those just 'flat' 3d models, or are they actual shapes?

a little friendly competition is healthy....this is getting a little out of hand, both mods have their ups and their downs, mistakes are being pointed out every day for each mod and in my opinion, the team that tries to correct the mistakes and makes an effort is the team that has the best mod, after all, the idea of making a mod is so other people can enjoy your ideas and hard work. not so that you can boast about your achievements and ignore your flaws. i think everyone would be better if you guys made up and instead of dreading each other, help each other to better both mods.

you have a choice, do something about it or you can just keep going on and on about this the way you have. putting someone down is not a 'good' and 'responsible' person would do. some day, your going to wake up and realise that this whole thing is a mistake, until then, try to keep to yourself, we don't want to know how much you guys feel threatened by the other mod. If you guys think that way, then go ahead and do it, we don't care, nor do we want to know.

I believe the majority of people who hate Reborn will continue to do so despite the few individuals, like yourself, who refuse to ignore what we say and act like it's some kind of major problem to hate something that sucks shit through a straw...

As for Retardin, you don't need to be posting our updates here. You should actually try working on Reborn for once. :rolleyes:

What Aircraftkiller is pointing out is that until that does happen, the only thing Reborn can be judged on is what has already been presented. We all know what that is.

It comes from Renegade. Praytell, why should I "get a life" when I'm already living and am quite happy with where I live, how I live, and what I do? Or is that just your way of trying to look as if you've got some kind of implied social activities in your life beyond school, as though they had any bearing whatsoever on the Internet; and more specifically on this forum?

The reason why I posted that quote was to show you that you shouldn't be attacking others simply because you're a hypocritical idiot who doesn't know the first thing about a discussion with another human being on the Internet or how to prevent yourself from contradictions in each of your posts.

So, when you attack me, it just goes to show that you're still an idiot regardless of what you say. So, instead of worrying about my personality, social life, whatever else you can come up with... Try worrying about yourself and why it is that whenever you say something, you look like a total fucking retard.

It would help. But then again, it is you that I'm talking about here... I'm not going to expect much more than another reply full of spelling errors, contradictions, and overall idiocy.

Thanks for the laugh. It's good to laugh at something other than using this pathetic 56k modem until the line technician fixes my DSL line tomorrow.

Quote:1) Ok, westwood didn't give any permissions to ack about using the renegade models (the unused assets).

You cannot prove that. I know for a fact that Louis Castle, co-founder of WS, authorized me to get the assets I wanted from them. Otherwise I wouldn't have gotten them. I distinctly recall two important artists telling me "The company doesn't just let us throw this stuff around, we need to get you permission first, so wait until tomorrow and we'll see what he says."

Quote:2) Ack tried to make Kalle Bowo, Permagrín and Sanada leaving Reborn. He failed. (afraid of their knowledge ? They are for sure better artists than you.)

The latter two say they're leaving anyway. The first is a TS worshipping, brainless moron. He would worship a fucking toilet bowl with the TS logo slapped on it. Definitely not someone I want working on my team.

Quote:3) Ack lick ass of our team members to get some informations. Everytime he does it, my team reports it.

If by "licking ass" you mean "bribery and deception" then sure!

RA is like the United States rolling into Baghdad, and Retardin, the Iraqi information minister, is screaming "THE AMERICANS ARE LYING! THERE ARE NO AMERICANS IN BAGHDAD! IT IS ALL PROPAGANDA!!"

Quote:ya see, no matter what it is if you give ACK a suggestion, he won't listen to it or even look and see if it could be helpful, he's right were all wrong thats the way it is in his tiny o so tiny little

world.

"BOY, DO NOT ASSUME! IT MAKES AN ASS OF YOURSELF! WHAT YOU THINK YOU KNOW IS A COMPLETELY DIFFERENT REALITY THAN WHAT YOU REALLY KNOW, SHIT-FOR-BRAINS!"

In other words, you don't pay attention and you think your misguided view of me is reality. If I didn't listen to anyone, if I didn't take suggestions, and whatever else your dumb self believes - that would go against my philosophy in life completely. I work to improve myself, not to get my ass kissed.

Quote:Theres no sense in constintly arguing with him, he wants attention and your all giving it to him if we'd all just inorge his comments / post that are flaming reborn and every other damn thing in the world he probably would shut up just a tad.

You're right for once, there is no sense in constantly arguing with me... Because you're constantly wrong. Attention has nothing to do with it. If you were actually right for once in your fucking life I wouldn't need to respond. Go back to school and stop wasting my tax dollars.

Ok, I will try to explain it on another way (I speak french this is why most of the time you don't understand me.)

Louis castle and sperry, by letting westwood in the hands of EA lost any control or permissions on those models. Now, all the stuff related to renegade that was made by westwood belong to EA.

it doesn't have anything to do with the fact you got that before of after. And unless you have an

official paper for that, you can still tell that story to EA. But I think it's not a problem for them as they don't care anymore about Renegade stuff.

Yes, they transfer the rights and materials and whatnot to EA since they own them now, but they gave that stuff to Aircraftkiller before, meaning that they didn't own them when EA took them over, so it couldn't have been transferred.

Renardin6Wanna know some new stuff :

1) Ok, westwood didn't give any permissions to ack about using the renegade models (the unused assets).

2) Ack tried to make Kalle Bowo, Permagrin and Sanada leaving Reborn. He failed. (afraid of their knowledge ? They are for sure better artists than you.)

3) Ack lick ass of our team members to get some informations. Everytime he does it, my team reports it.

Just try again to do that. Reborn is a team, we talk and you should stop your shit because we laugh at you for that, ass-licker.

News flash: Nobody cares.

Not true. I don't like his work either, not because Aircraftkiller doesn't like it or because of Reborn's old beta, but because it does suck. He uses the same style of texturing for every vehicle, and it's so bland (referred to as "plastic"), has the weirdest colored looking metal for GDI, and has the same scratching pattern that isn't even realistic.

If you, Renardin, decide to take my advice, I suggest that you learn to use variety and use a different effect instead of the same one over and over for metal. Also try different tinting for that gold look, and don't make the scratches tile.

You did falsify the logs. When we paste something from the RenGuard logs, we purposely edit out some non-public information that appears in the alerts. Wherever you got that, it was not a direct log.

However, what I can tell you is that we don't, by default, get an alert if you launch RenGuard with disallowed files and get disconnected. We only see alerts when someone tries to drop the files into the data directory mid-game. Interpret that how you will, but Renardin DID in fact drop the models in after he connected to the server in an attempt, I assume, to fool RenGuard, which obviously failed miserably. He was not, however, kicked for objects.ddb. That was a deliberate falsification.

I added that not mid-game...

I can explain : I started Renegade with GSA. So Renguard open, but I have to click Renegade to start the game. And I told myself, it would be cool to use my modified first person view spas instead of the renegade shotgun, just because I like my model, so I added the file to data folder and then clicked 'Renegade'. When renguard checked files again some seconds after, it kicked me...
